

CONSENT TO PRESCRIBE OPIOID MEDICATION TO A MINOR

Background: Pennsylvania law requires that in most non-emergency circumstances, a minor may only be prescribed opioid medications (morphine-like drugs) if the prescriber first discusses the potential risks associated with the medication with the minor and also with the minor's parent, guardian, or an adult who has a valid health care proxy to consent to the minor's medical treatment. This consent form memorializes that the prescriber discussed the risks associated with opioid medications with you and the minor-patient. Please review the information listed and put your initials next to each item after you and the minor-patient have discussed the risks with the prescriber and feel you understand and accept what each statement says.

The medication being prescribed above is a controlled substance containing an opioid. This means the medication has been identified by the United States Drug Enforcement Administration as having a potential for abuse, dependence or misuse.

As the responsible prescriber, I certify that I have discussed with both the minor, as well as with the minor's parent/guardian/authorized adult the following items:

- | | Adult
Initial |
|--|------------------|
| (i) The risks of addiction and overdose associated with the controlled substance containing an opioid. | _____ |
| (ii) The increased risk of addiction to controlled substances to individuals suffering from mental or substance use disorders. | _____ |
| (iii) The dangers of taking a controlled substance containing an opioid with benzodiazepines, alcohol or other central nervous system depressants. | _____ |
| (iv) Any other information in the patient counseling information section of the labeling for controlled substances containing an opioid that I deemed necessary. | _____ |
