CONSENT TO PRESCRIBE OPIOID MEDICATION TO A MINOR

Background: Pennsylvania law requires that in most non-emergency circumstances, a minor may only be prescribed opioid medications (morphine-like drugs) if the prescriber first discusses the potential risks associated with the medication with the minor and also with the minor's parent, guardian, or an adult who has a valid health care proxy to consent to the minor's medical treatment. This consent form memorializes that the prescriber discussed the risks associated with opioid medications with you and the minor-patient. Please review the information listed and put your initials next to each item after you and the minor-patient have discussed the risks with the prescriber and feel you understand and accept what each statement says.
